## **Ohio Ranks 8<sup>th</sup> Among All States in Efforts to Serve Individuals with Intellectual and Developmental Disabilities**

### *The Case for Inclusion 2019 Ranks States on Policies and Programs that Encourage Employment and Community Living*

**WASHINGTON, D.C.** – Ohio has made significant strides to improve policies that help individuals with intellectual and developmental disabilities lead more independent and productive lives, propelling the state from 48<sup>th</sup> place in 2007 to 8<sup>th</sup> place this year in state rankings compiled by the ANCOR Foundation and United Cerebral Palsy (UCP).

[The Case for Inclusion 2019](#) ranks all 50 states and the District of Columbia on how well state programs, primarily Medicaid, serve those with intellectual and developmental disabilities (I/DD). The states are ranked in five key areas critical to the inclusion, support and empowerment of individuals with I/DD and their families: Promoting Independence, Promoting Productivity, Keeping Families Together, Serving Those in Need, and Tracking Health, Safety & Quality of Life.

Ohio's strongest performance was in the area of Keeping Families Together, in which the state earned a 2<sup>nd</sup>-place ranking, in part because of its high percentage of individuals with I/DD living in their family homes (74 percent, compared to a national average of 62 percent). Ohio also saw better-than-average outcomes in competitive employment, defined as the percentage of individuals with I/DD working alongside individuals without disabilities and earning market-driven wages. At 23 percent, Ohio's competitive employment rate was four percentage points higher than the national average.

Despite these important accomplishments, Ohio, like most others, struggled in two critical areas: (1) the number of individuals on waiting lists to receive Medicaid-funded supports and services, and (2) the percentage of state expenditures allocated to support individuals in home- and community-based settings. For the former measure, Ohio saw nearly 65,000 individuals on its waiting list for Home and Community-Based Services, meaning the state would have to expand its current offerings by 175 percent in order to keep pace with current levels of demand. For the latter measure, 79 percent of Ohio's spending went toward supporting individuals in home-like settings; only 12 other states performed worse than Ohio in this area.

Nationally, the number of people on waiting lists for Home and Community-Based Services was up 75,000 from the 2016 report to almost 424,000. Just seven states, down from 10 in 2016, reported at least 33 percent of working-age individuals with I/DD working in competitive employment.

“Individuals with I/DD, including the young and the aging, want and deserve the same opportunities and quality of life as all Americans. Yet some states do much better than others in demonstrating the needed political will and implementing the sound policies and focused funding necessary to achieve this ideal,” the report states.

The *Case for Inclusion*, which has been published regularly since 2006 by UCP, compiles the most recent data available (generally from 2016 for this report) and analyzes 30 outcome measures in the five major categories. The ANCOR Foundation joins UCP this year in publishing the report. Among the other findings on Ohio’s performance:

- The number of individuals with I/DD receiving services through Home and Community-Based Services waivers was 86 percent, lower than the national average of 92 percent.
- Although lower than the national average of 1.7 percent, 0.7 percent of Ohioans with I/DD—or 721 individuals—were living in large, state-run institutions. Ohio continues to operate 10 large-scale institutions that warehouse individuals with I/DD.
- Beyond the state’s residents with I/DD living in institutions, an additional 6,096 individuals with I/DD were living in large-scale congregate care settings, defined as group homes or Intermediate Care Facilities with at least seven residents.

Nationally, the report found that notable advances in the support of individuals with I/DD have stalled. For instance, just 29 states—two more than in the 2016 *Case for Inclusion*—report that at least 80 percent of these Americans are served in home-like settings, such as a family home, their own home or a small group setting—a number that hasn’t budged from the 2016 *Case for Inclusion* findings. And decades after states embarked on efforts to close large institutions that warehouse the intellectually and developmentally disabled, just 15 states have eliminated all such facilities, a number that is also unchanged from 2016.

Factors driving the stagnating or downward trends include states forgoing Medicaid expansion and growing shortages in Direct Support Professionals (DSPs), the frontline workers who help those with disabilities integrate into the community. “The DSP workforce crisis may be the most significant challenge we face in improving the outcomes tracked by the annual *Case for Inclusion*,” said ANCOR and ANCOR Foundation CEO Barbara Merrill. “Without the professional staff needed to provide the supports and services that enable people with I/DD to be integrated into the community, provider agencies have little hope of maintaining and expanding on any progress they’ve seen in the past decade.”

It is notable that during a period of polarization on many issues, policies that support individuals with I/DD have support from stakeholders across the political spectrum. For example, the 10 highest-ranked states are a political mix, including deep-blue Oregon and California and deep-red Kentucky and South Dakota. Armando Contreras, President & CEO of UCP, notes that “across the country, we see efforts by state policymakers to enhance their approach to Medicaid services and supports and related programs for

the I/DD population by making the best use of existing and scarce resources. Of course, additional funding to keep pace with the diverse needs of this population would help, but new ideas and shared best practices from successful states have the potential to drive improvements even absent additional funding.”

###

### **About the ANCOR Foundation**

*The ANCOR Foundation ([ancorfoundation.org](http://ancorfoundation.org)) exists to expand the commitment and capacity of providers and communities dedicated to improving the quality of life of people with intellectual and developmental disabilities. The Foundation works to amplify the impact of service providers whose programs and resources empower people of all abilities to live independently, enjoy greater accessibility, and experience the self-confidence and self-satisfaction that comes with being an included and valued part of the community.*

### **About United Cerebral Palsy**

*United Cerebral Palsy ([ucp.org](http://ucp.org)) educates, advocates and provides support services through an affiliate network to ensure a life without limits for people with a spectrum of disabilities. Together with 64 affiliates, UCP has a mission to advance the independence, productivity and full citizenship of people with disabilities by supporting more than 176,000 children and adults every day—one person at a time, one family at a time. UCP works to enact real change—to revolutionize care, raise standards of living and create opportunities—impacting the lives of millions living with disabilities. For 70 years, UCP has worked to ensure the inclusion of individuals with disabilities in every facet of society. Together, with its member affiliates, parents and caregivers, UCP will continue to push for the social, legal and technological changes that increase accessibility and independence, allowing people with disabilities to dream their own dreams, for the next 70 years, and beyond.*
